Geoecological Problems

CHANGING CLIMATE

in the Krkonoše/Karkonosze Mountains

geoeko.krnapp.cz

2nd circular

21–23 September 2026, Špindlerův Mlýn, Krkonoše

**Kick off Meeting of the Project “Strategická a koordinovaná správa
KRNAP – KPN“ (CZ.11.04.01/00/24_017/0000184)**

Objective

The aim is to present current research results on the natural environment of the Krkonoše Mountains for application within the strategic planning of the administrations of Krkonoše Mountains National Park and Karkonosze National Park. The central theme is the ongoing climate change as a major challenge for nature conservation in both national parks. Contributions from all disciplines relevant to nature conservation in the Krkonoše national parks are welcome.

Language: English, Czech and Polish

Participants

Researchers and academics, students, employees of national park administrations and nature conservation institutions, and other representatives of the professional community.

Call for contributions

Participants can submit the title of their oral presentation or poster during online registration. Presentations should be 15 minutes long, and posters should be no larger than A0 in height. Please send the final versions of your abstracts by June 30, 2026. Titles, abstracts, and texts in presentations must always be in English.

Preliminary programme

Monday, September 21
